M. FREMIET, the first sculptor of animals in France, has been charged with a curious work by the Emperor. This is, to carve in marble miniatures of all the corps Also to return at the same time to the Pro in the army, both foot and horse. Eight inches is the height of the infantry. The most particular attention is to be paid to the uniform and the acconterments of both men and horses. The collection, when completed, will number not far from one hundred statuettes. It will, doubtless, be exhibited to the public at the Fine Arts Department in the Exposition of next year.

New Dining Sations.

THE undersigned have opened a victualing saloon in this village in the New brick building on Main Street, situated between the Bank and the Town Hall. Their rooms are elegantly fitted up, and neatness, order, sobriety and quiet will be the order of the day in their establishment. Refreshments will be constantly supplied with all the delicacies of the season, such as Flah, Game, Oystera, §c. The Proprietors design that it shall be in the strictest sense a first glass Dining Saloon, where the highest respectability shall be pnaintained and where Gentlemen and Ladies may enjoy a quiet retreat, and procure all such refreshments, as the most asiduous care and painstaking can furnish.

They design that their rules and regulations shall be o strict that no one's character, dignity, or respecta-ility will be compromised by visiting their Saloon.

Pic Nic parties will be at all times furnished with re-

reshments.

THE success hitherto emjoyed by the auther of the above popular works is a sufficient guarantee of the favor with which any productions of coming from his sen, will be received by the public. "The Cabin Boy's Story" is a remande narrative, it instrating the horrors of the Slave Trade, an carried on in the Coast of Africa. The author has served in the navy—and the descriptions and characters are painted from personal acquaintance with them. The story is fall of exciting interest and seventare as the celebrated work of Defoe, "Robinson Crassoe," and has the advantage over that glorious fiction, inasmuch as it is founded on facts of every day occurrence. The history of the heroine of the Story, Zuleka, the Circassian Slave, purchased at Constantinopie, educated and married by the reckless, yet chivalric, Seymour—the commander of the Albatross, is simply the narration of a fact painted from the life, and all the numerous characters portrayed throughout the story are vividity and graphically drawn.

The publishers have already received orders for the whole of the edition it was originally their intention to publish; consequently, they have been obliged largely to increase it; and they respectfully request that all orders may be sent in immediately.

They confidently expect that the work will create as much highest sanay word of fiction that has of late years omanied from the press, as, notwithstanding, as ince the publication of "Uncle Tom's Capin," works relating to slavery in America, Pro and con, have been numerous, none have appeared having relation to the sanguage, and will be a welcome and instructive addition to the family library.

The work will form a beautiful octave volume of 400 pages, handsomely illustrated with fing engravings, and elegantly bound in cloth. Price, in cloth, one dollar; in paper, 75 equits, at which rates copies will be aentby the publishers to any part of the country, froe of post-age.

PARALVNIS.

Many enquirerr being made concerning this fermidable disease, we select for the present report a letter from ann old and well known citizen of Portoge county. Ohio. It was written in December 1850.

In a few instances since remedles have been temporarily resorted to, by which he has not only retained comfortable health and powers, of endurance, but thus far escaped all farther, attacks of Paralysis:

Dr. Tunns:—Having employed your treatment for some time, I sond Acu the result, which you are at liberty to publish for the bunefit of dihers. I was taken a shock of Paralysis in February, 1848: It only affected my arm and volce as first, but the pain in my arm which followed the shock become more severe, and extended over my system. After the shock I was still able to walk, but had little strength; and my limbs were weak and numb. I adylagd with several physicians, some recommended calumel, but was not relieved. My general health was very poor when I applied to you, in January, and though you gave my very little encouragement, at the time, I obtained medicine and commenced its use. For the first two weeks I felt slightly worse, after that, improvement commenced, and has continued until I am able to labor most of the time. I now feel like a new man.
